days

30th june — 09 july 2017

Set the course for changes.
Full speed ahead!

storm

Let's meet in Gdynia, where the 10th edition of Gdynia Design Days will soon start – it is the most important summer festival of the design industry in the Baltic region. By taking advantage of the charms of a seaside resort and the advantages of the modernistic port city GDD will once again create a platform for exchange of ideas and best practices for designers, entrepreneurs and all design enthusiasts. The rich program will be filled with inspiring exhibitions, workshops

and meetings with artists. This year's theme is Storm – not in the destructive sense but rather as a creative force, which generates the need for changes. We want the festival to be a time of transformation, purification, discoveries and good beginnings. For the 10 days, which the festival will last, there will be plenty of opportunities to check out the utility, social and economic possibilities offered by contemporary design and to feel the atmosphere of creative pursuit.

All hands on deck!
